## **DETAILED ACTION**

### **Response to Arguments**

#### **Claim Rejections U.S.C. 103**

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5-11, 15-24, 26, 28-32, 36-55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sang-jin Lee (USPN 6191758) in view of Bobby Lee (USPN 5999169)

Regarding claims 1, 20, 28, 36, 47 and 54-55, Sang-jin Lee teaches a computer with the main display (10) and an auxiliary display (12). Sang-jin Lee teaches that main application programs are to be displayed on the main display device and auxiliary application programs are displayed on auxiliary display device. See column 4, lines column 4, lines 32-53 and Fig 1. Sang-jin Lee teaches the main display controller (216) and the auxiliary display controller (218), each determining the execution result of the application program to its respective display device. See column 5, lines 44-55, Fig 3 and Fig 4. Sang-jin Lee also teaches a computer system having an external RS232C interface device for communication purpose. See Fig 2. Furthermore, Sang-jin Lee teaches the auxiliary display device, its method and application execution with respect to the enablement of the auxiliary memory. However, Sang-jin Lee does not teach an additional input

Art Unit: 2674

user interface applicable to the second application to be displayed on the auxiliary display. Bobby Lee on the other hand teaches first and second mechanisms (8 10) corresponding to mouse surface contact ball and track point device that produce signals to a multiplexer (12). See Fig 2 and column 4, lines 20-28

Therefore it would have been obvious to one skilled in the art to modify Sang-jin Lee's computer system to include Bobby Lee's input device with the first and second mechanisms. One would have been motivated in view of the suggestion in Bobby Lee that the two mechanisms (8 10) provide the desired additional input user interface. The use of the two mechanisms helps function a computer system with multiple inputting configurations.

Regarding claims 2-3, 7-8, 43 and 45-46, See S. Lee's Fig 1 (10, 12).

Regarding claim 5, S. Lee teaches the use of RS232C interface device in connection to auxiliary display device. See Fig 2.

Regarding claim 6, S. Lee teaches a keyboard controller (518) for controlling the keyboard (56). See column 67, lines 18-19, Fig 1 and Fig 5.

Regarding claims 9-11, 23-24 and 42, S. Lee teaches an auxiliary memory (622) including graphic memories (614, 616) for storing purposes, a second data serializer (618) for converting into an appropriate form of data, and displaying the data through second attribute controller(620). See column 6, lines 53-65.

Art Unit: 2674

Regarding claims 31-32 and 38-39, S. Lee teaches a keyboard controller (220) along with a serial interface device communicating with external interface device. See column 5, lines 11-14. And Fig 2

Regarding claims 37 and 40-41 S. Lee teaches an auxiliary display controller (218) for controlling the auxiliary display device (24). Column 5, lines 24-28.

Regarding claims 15-16, S. Lee teaches a vacuum fluorescent display (VFD) (18) which performs a predetermined program. See column 4, lines 32-41 and Fig 1.

Regarding claims 17-19, 21-22, 26 29-30 and 44, S. Lee teaches executing application program (S40) followed by determination of selection information of a display device (S42). Fig 4.

Regarding claims 48-53, B. Lee teaches the use of programs and engineering techniques including links such as the Internet and other networks through which codes are transmitted. See column 7, lines 26-42.

### **Conclusion**

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
